

ANOSHIELD

THE APPEARANCE OF PAINT. THE PERFORMANCE OF LAMINATE.

AnoShield is a premium timber doorset developed to deliver the sophisticated appearance of painted doors whilst overcoming many of the durability and maintenance challenges associated with traditional factory-painted finishes.

Each door leaf is faced with Polyrey Touch® anti-fingerprint laminate, helping to reduce the visibility of fingerprints, handling marks and everyday wear whilst maintaining a refined decorative appearance.

Combining advanced surface technology with colour-coordinated detailing, AnoShield

has been designed for architects, specifiers, contractors and building owners seeking a durable, low-maintenance alternative to conventional painted doors.

Key Features

- Polyrey Touch® anti-fingerprint laminate facings
- Superior scratch and scuff resistance
- Colour-coordinated detailing throughout the doorset
- Reduced maintenance requirements
- Excellent appearance retention
- Suitable for high-traffic environments
- Available as FD30 and FD60 fire-rated doorsets

COMPLETE COORDINATED DOOR SET

A key feature of the AnoShield range is its ability to provide a fully coordinated appearance throughout the opening. Unlike many laminate-faced doors, every element can be carefully selected and finished to deliver a premium architectural appearance from face to frame.

POLYREY TOUCH® ANTI-FINGERPRINT FACINGS

Each door leaf is faced with premium Polyrey Touch® anti-fingerprint laminate, providing a durable decorative surface that helps reduce visible fingerprints and everyday handling marks.

COLOUR-MATCHED GLAZING BEADS

Glazing beads are factory painted to complement the chosen door finish, creating a consistent appearance around vision panels.

COORDINATED DOOR EDGES

Door lippings are finished to compliment the face finish, providing a seamless transition from face to edge.

FACTORY PAINTED FRAMES & ARCHITRAVES

Door frames and architraves can be supplied in coordinating or contrasting painted finishes, creating a complete doorset offer with visual consistency throughout the opening.

WHY CHOOSE ANOSHIELD

Enhanced Durability

Traditional painted doors can be susceptible to:

- Scratches
- Scuffs
- Chipping
- Site damage
- Finish inconsistencies
- Frequent touch-up requirements

AnoShield provides a highly durable decorative surface designed to maintain its appearance in demanding commercial environments.

DESIGNED FOR LONG-TERM PERFORMANCE

REDUCED MAINTENANCE

Unlike painted surfaces that may require periodic repair, touch-up or redecoration, AnoShield has been developed to minimise ongoing maintenance requirements and reduce whole-life costs.

CONSISTENT FACTORY FINISH

Polyrey Touch® decorative laminates provide exceptional consistency from door to door, helping maintain design integrity across projects of all sizes.

CONTEMPORARY DESIGN

The Polyrey Touch® collection offers sophisticated colours, tactile textures and anti-fingerprint technology, allowing designers to achieve a premium painted appearance with enhanced durability.
